which if willingly ignored as an important research point, would it not be tantamount to a crime against humanity which contravenes the following laws and statutes?:

We are deeply concerned by these matters raised by professional opinion and research, and call on you as Our public servant, to act on Our behalf to cause the immediate cessation of all further installations and operations of the "5G" technology program, until such time as all legal and lawful requirements are met and satisfied concerning this technology and its apparent detrimental effects upon life and the environment.

We do require a response within twenty-eight (28) days, and look forward to your prompt response.

We trust that you understand,
